October 10, 2014

JOLIET FIRE DEPARTMENT CONDUCTING NEXT PHASE OF ITS ANNUAL HYDRANT TESTING

The Joliet Fire Department will be entering the fifth phase of its annual hydrant testing beginning Monday, October 20, 2014. The testing program will be conducted Monday through Friday between 8:00 AM and 4:00 PM. The hydrant testing will continue for approximately 6 weeks, depending on the weather.

During this phase, testing will take place in the following areas of the City:

- The geographical area bounded by Theodore Street to the north, the DesPlaines River to the east, Larkin Avenue to the west, and I-80 to the south.
- The geographical area bounded by Rosalind Street to the north, Spring Creek to the east, Collins Street to the west, and Cass Street to the south.

The Fire Department will take precautions to reduce the impact of possible rusty water. The City of Joliet will provide a chemical that removes rust from clothes in a washing machine, however, be cautioned that affected clothes must not be dried until they have been properly run through a rinse cycle that includes this chemical.

The chemical will be available at any Joliet Fire Station, free of charge. For those without transportation call the City of Joliet Water Department at (815) 724-4220 or the Joliet Fire Department at (815) 724-3500.

James D. Hock
City Manager

The City of Joliet is the fourth largest city in the state of Illinois, located just 45 miles southwest of Chicago’s Loop. Home to over 147,000 residents, in addition to thriving businesses and attractions, the City of Joliet is easily accessible by rail, auto and bus transit. A perfect place to live, work and play, Joliet is constantly striving to promote growth and diversity. For more information on Joliet visit www.cityofjoliet.org or call 815-724-4000.
